

Delivering Projects On-time and On-budget

Course description

Many IT departments have a very poor track record for delivering projects on-time and on-budget. However, there are some that are consistently successful. How do they accomplish this feat? Can my company improve our performance? What does the improvement buy me? How hard is it to get buy in for the change? Find out the answer to these questions and more. This interactive seminar explores:

- Benchmarking your company's current success rate
- Is on-time and on-budget a moving target?
- The causes for not delivering on your promises
- What can be done to improve this performance?

If your IT department is having difficulty consistently delivering projects on-time and on-budget, then this seminar is for you. You are encouraged to bring your questions and concerns to discuss with the instructor and fellow attendee's. You will leave with not only a new understanding of how to consistently deliver project on the promised date and for the agreed price, but also a plan of action for improving your company's performance.

You will learn

- How to benchmark your current performance
- What successful companies have done to improve
- What you need to do to improve
- How to develop meaningful metrics
- Who should be involved in improving the performance
- How to get "buy-in" for process improvement

Who should attend?

All personnel involved in the identification, planning and implementation of improving project on-time and on-budget performance.

Format

This course is one day of lecture and individual and group workshops presented in an interactive format. Real world examples are utilized to make the information relevant. The emphasis is on techniques that allow attendees to transition the skills learned in this workshop to their own work environments.

Instructor

Thomas C. Staab, MS, CSQA, CSTE, CSPM, is President of Wind Ridge International LLC, a resource management firm specializing in the Information Technology (IT) arena. He is an internationally recognized expert in the Testing Maturity Model (TMMSM) and Information Technology outsourcing.
